

Bibliographical database on mathematics teaching

<http://publimath.univ-irem.fr/>

Persons in charge: Michèle BECHLER et Hombeline LANGUEREAU

PUBLIMATH has been developed by the APMEP (French association of mathematics teachers) and the ADIREM (committee of the directors of IREMs that are Institutes of Research into Mathematics Teaching) since 1996, with the support of the CFEM (French commission on Mathematics Education) and of the ARDM (Association for research in mathematics didactics).

PUBLIMATH offers notes about various mathematics education oriented publications

- useful for teachers from nursery school to university, students, teacher educators, research workers, etc.
- concerning various documents (books, magazines, software, videos, websites, etc.).
- some of them improved by supplements in English, German, Spanish, Italian or Portuguese.

PUBLIMATH includes, for each indexed document, a summary which is often quite developed, keywords describing it in detail, written and chosen by field specialists. This specificity makes it very powerful.

PUBLIMATH allows users to consult among others

- all the publications distributed by the APMEP, those of each IREM or Inter-IREM committees, of the ADRM, ...
- the contents of scientific magazines: *Bulletin Vert* de l'APMEP, *PLOT*, *L'Ouvert*, *Petit Vert*, *Repères-IREM*, *Grand N*, *Petit x*, *RDM*, *Mathématiques et Pédagogie*, *Quadrature*, ...
- documents that cannot be found in the usual editing networks, about various fields : teaching, didactics, history, culture, arts and entertainment...

PUBLIMATH contains, since the end of June 2017, more than 24500 notes and offers access to a glossary including more than 3370 definitions 20 different fields.
